

## **Quality,-Environmental and SHE (MEB+VCA/SCC) politics**

**The activity of the Inwatech Environmental Protection Kft. is focused on satisfying the needs of customers at an ever higher level. In addition, we pay special attention to the aspects of environmental protection and occupational safety. The basis of all this is the development of expertise and IT that influences quality, and the deepening of thinking that focuses on environmental awareness and occupational health and safety, both within the organization and among subcontractors.**

In order to maintain and continuously improve the high standard of our service activities achieved so far, the management of the company has decided to introduce and operate a quality and environmental management system.

In order to continuously improve the quality of our services:

- we are constantly informed about the client's needs, their changes, we assess and analyze them
- we strive to satisfy the client's needs reliably, accurately and within the undertaken deadline
- we constantly monitor the activities of our subcontractors and suppliers

In order to continuously improve our environmental performance:

- the management of the company commits itself to the full observance of the environmental legal and other requirements, by ensuring the observance and enforcement of these within the organization by operating the system
- we perform our service and other activities in a way that minimizes the impact on the environment load
- In the course of fulfilling our orders, we try to propose technical solutions that cause the least damage to the environment
- we are constantly improving the environmental awareness of our employees and subcontractors

In order to continuously improve SHE performance:

The management of our company is committed

- ensuring personal and material conditions for healthy and safe working
- prevention of accidents at work, personal injuries and damage to health, and
- in addition to the prevention of material and environmental damage and the prevention of personal injuries.

We comply, and comply with the requirements of the relevant occupational safety legislation, the relevant customer requirements and the internal instructions of our organization, we set goals in order to improve and control our occupational safety results, the fulfilment of which is regularly monitored and evaluated annually.

We constantly monitor the SHE situation and performance of our organization and, where necessary, initiate measures to continuously improve it.

We are constantly developing our integrated management system in accordance with the changing customer, customer and legal requirements and the changing needs of our internal needs.

We make our quality, environmental and SHE (MEB + VCA / SCC) policies known to all our employees and subcontractors, train them regularly and expect them to be committed to their commitment.
